

1. these buttons under the projects dropdown is not working, add remove filter button and also this filters are not working correctly

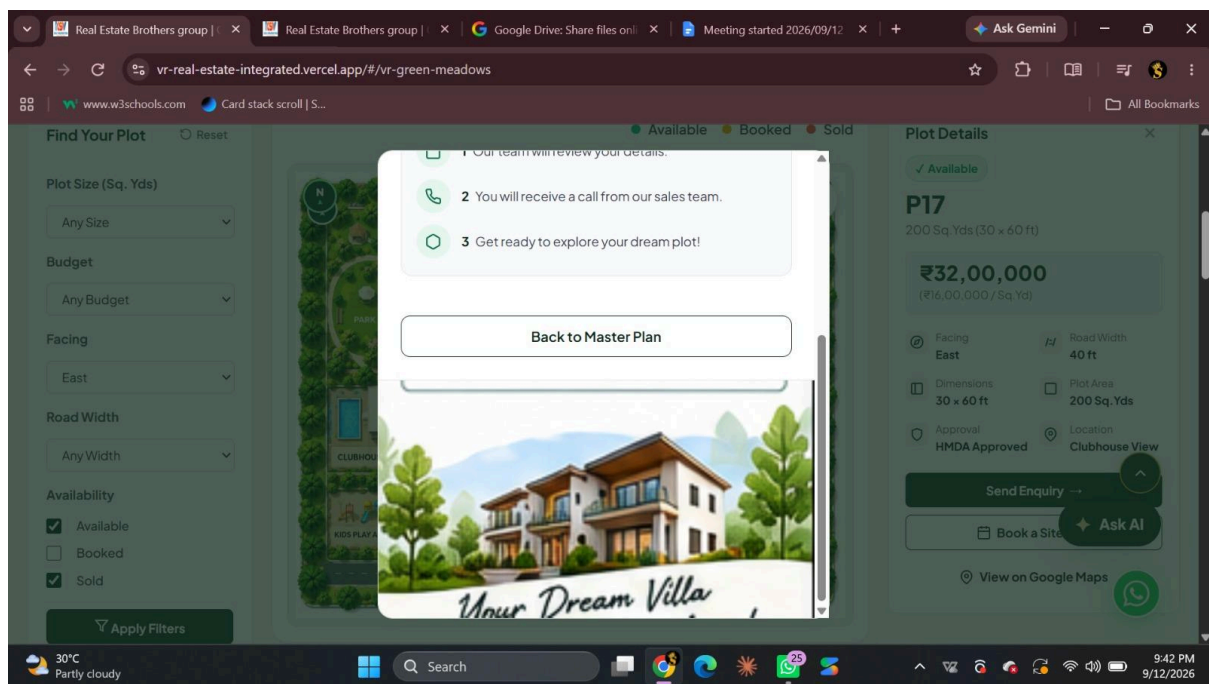

2. here we should add all the images of that villa like view from outside ,hall,kitchen images like that

3. villas filters are not working ,locations button in the nav bar is not working

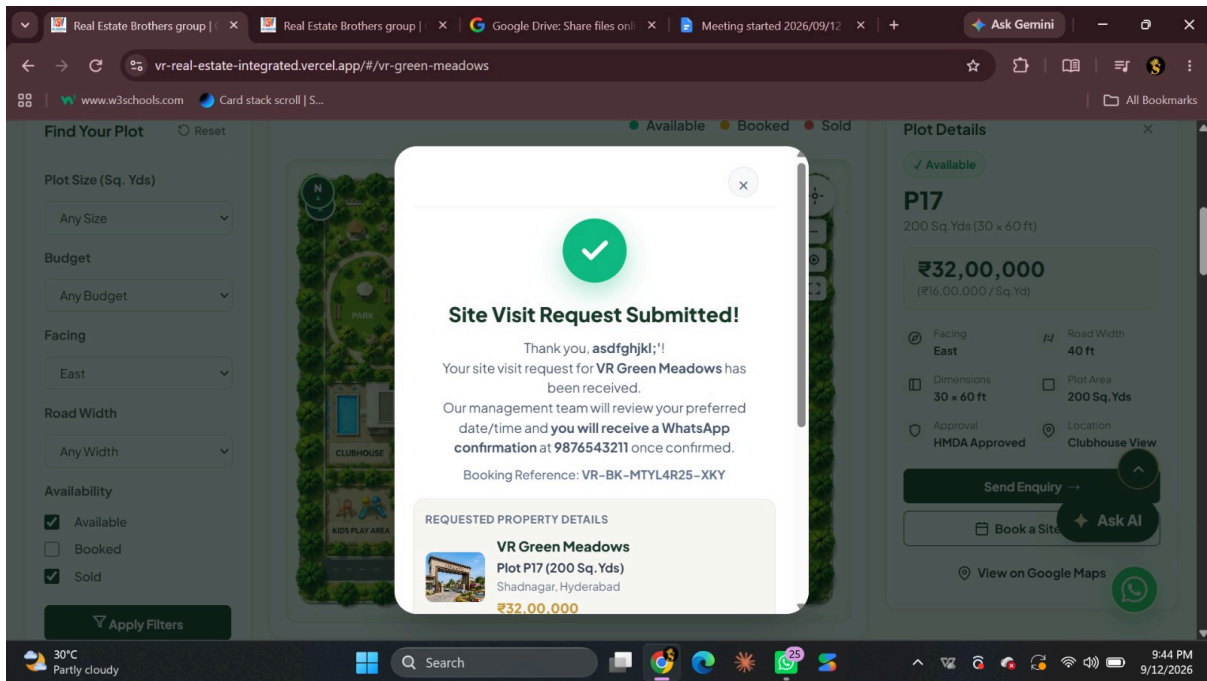

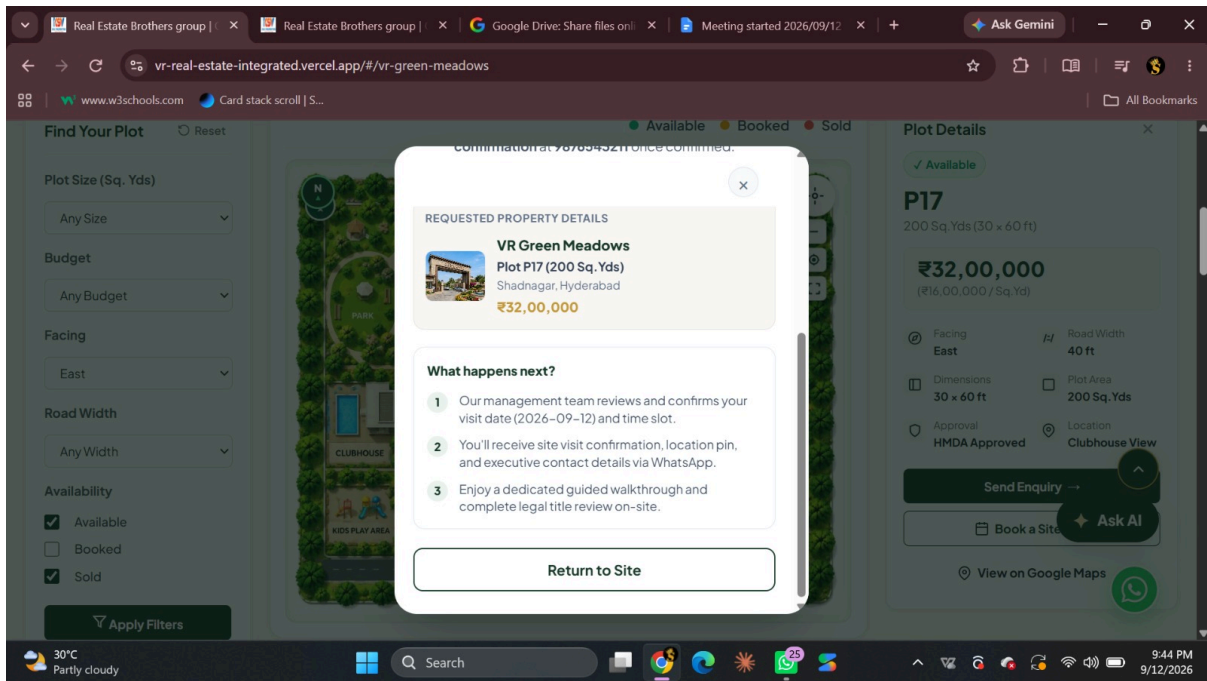

4. send us a message here is not good ,what is meant by brochure

5.

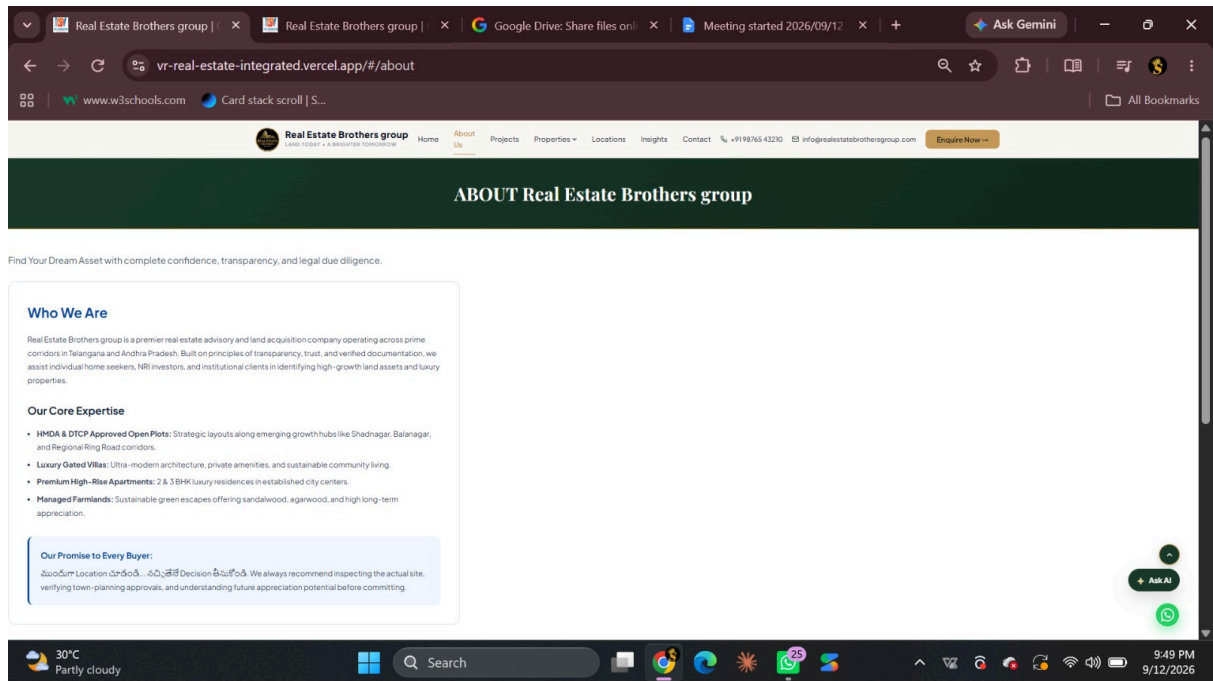

remove this villa image below when we send an enquiry from plots

6.

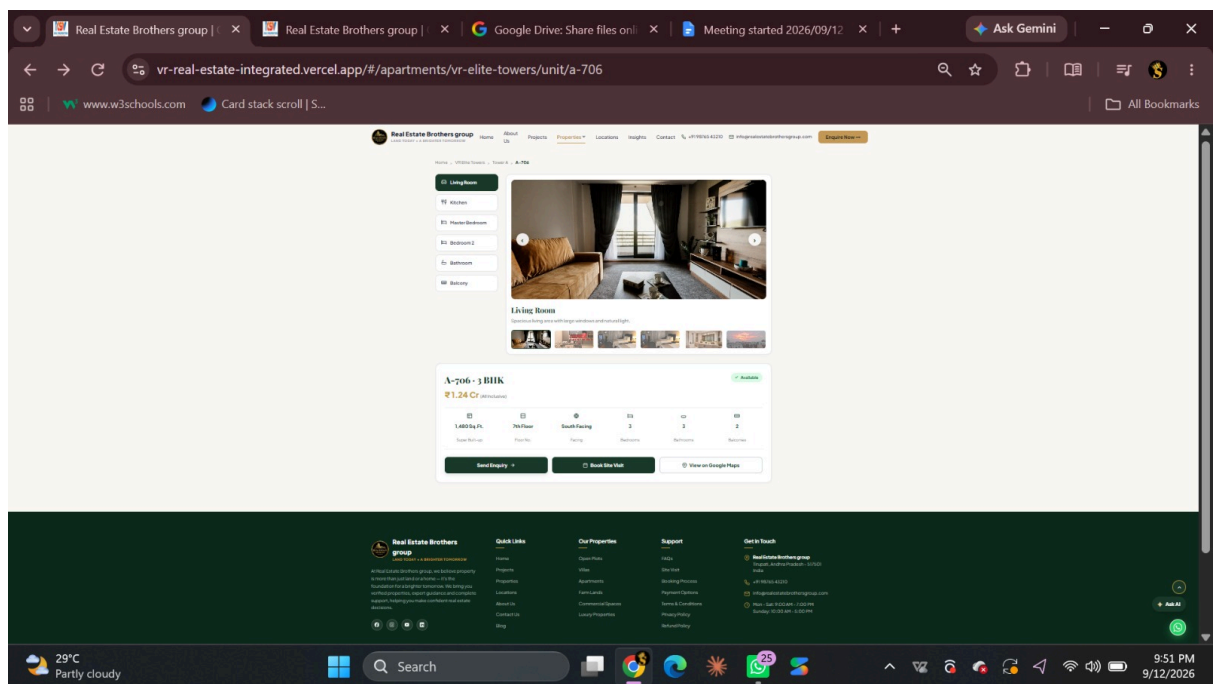

why ui is not good

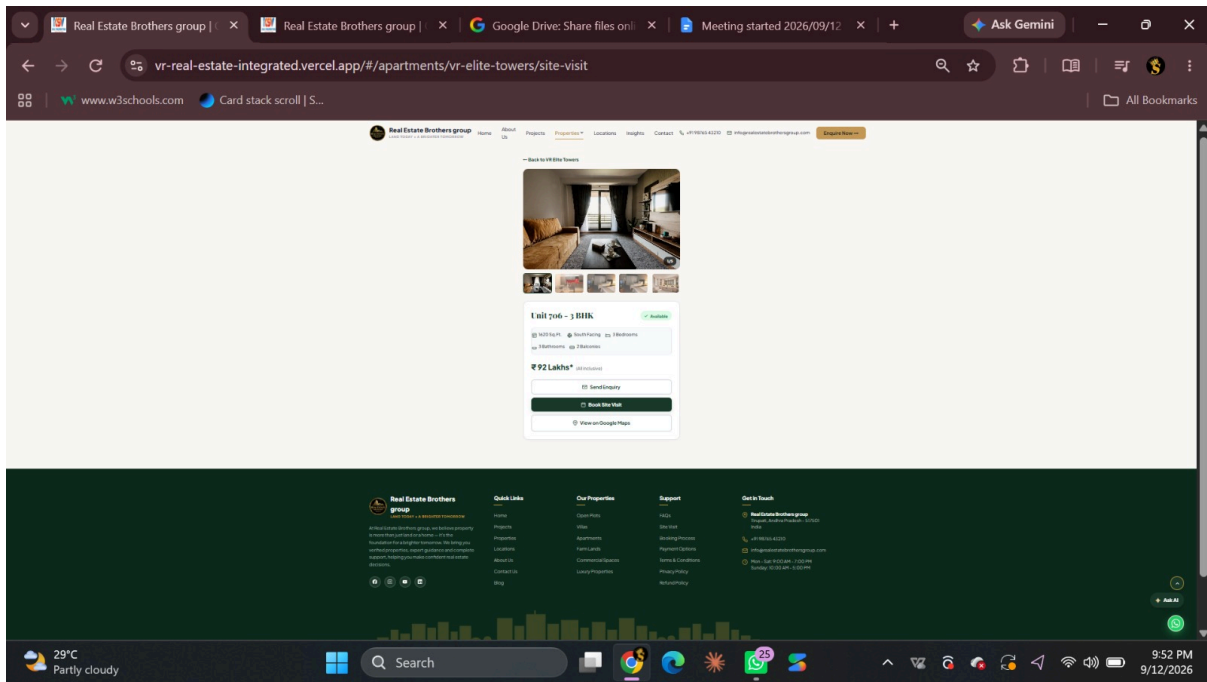

7.

changing about section

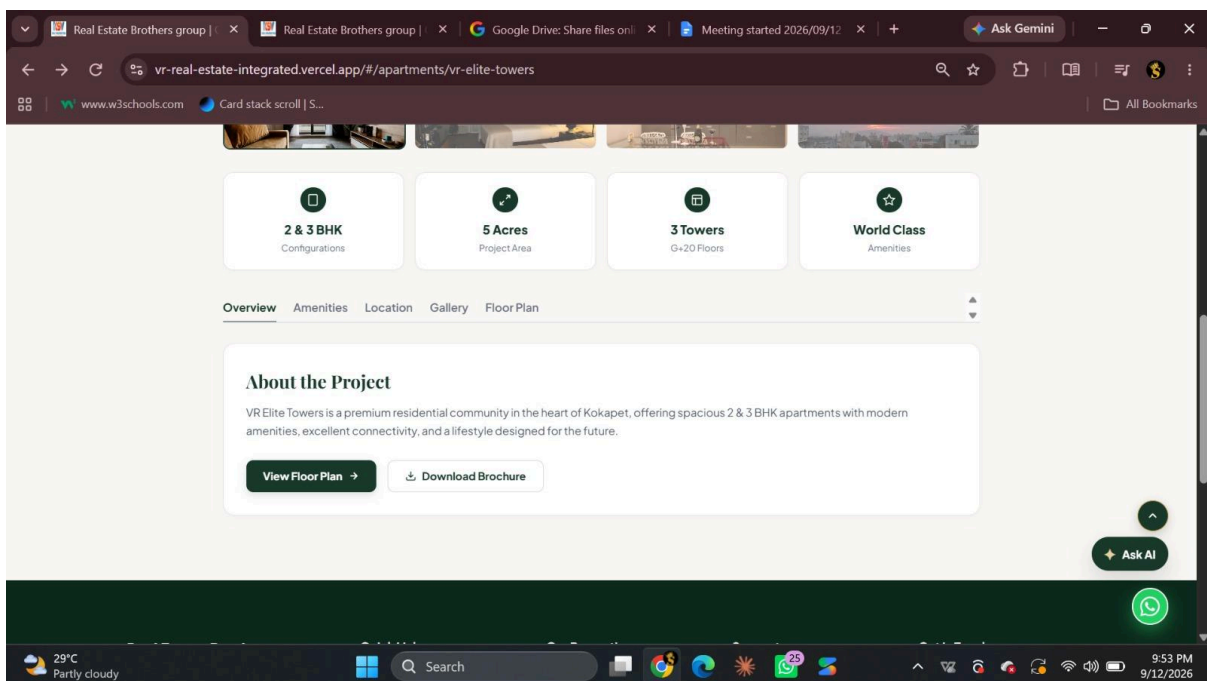

8.

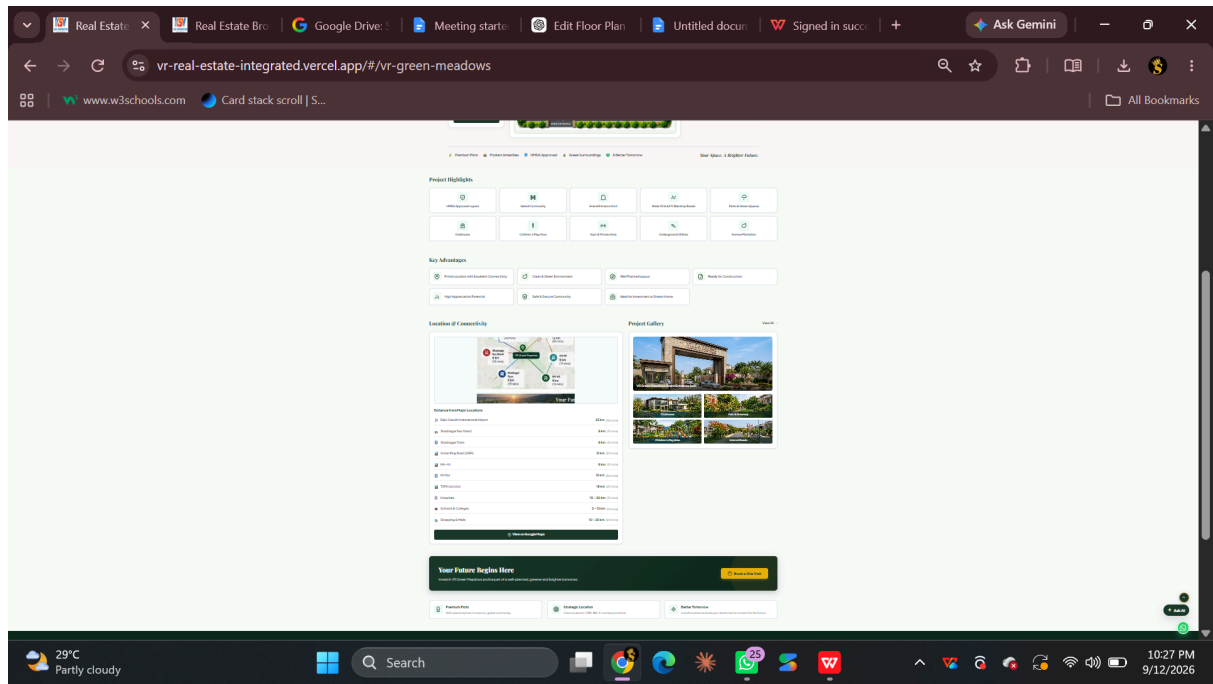

clicking on book site visit here is taking to another page i want to click book site visit again then it is asking to enter details

9.

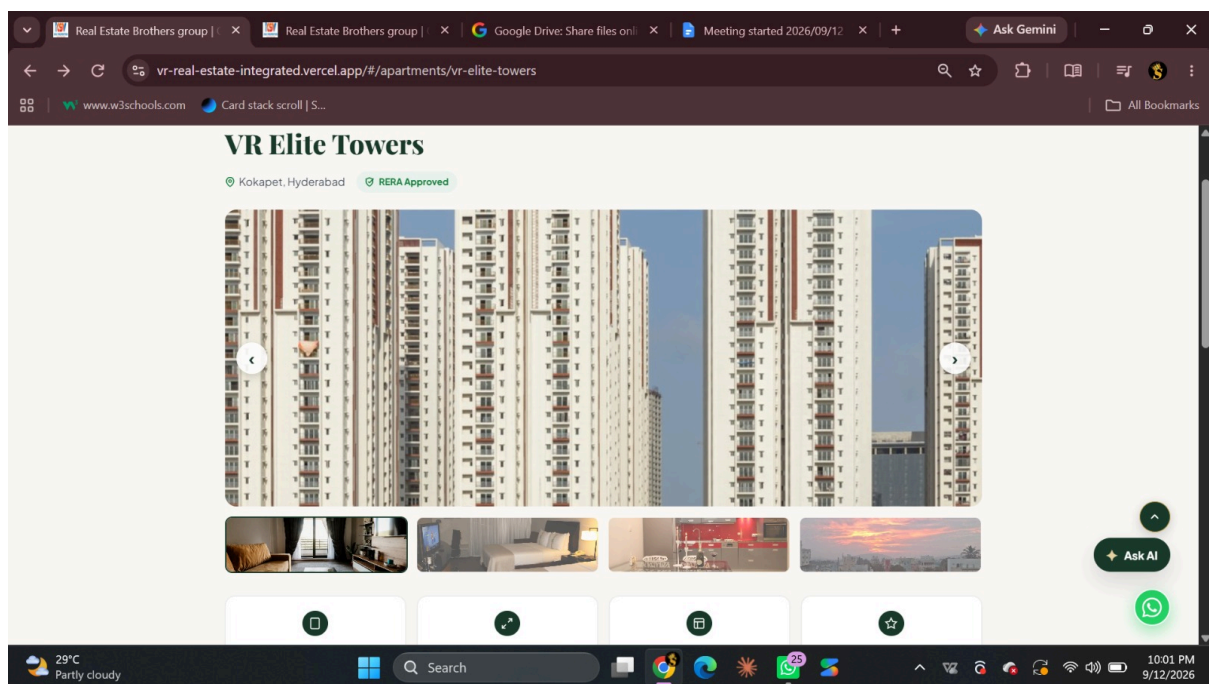

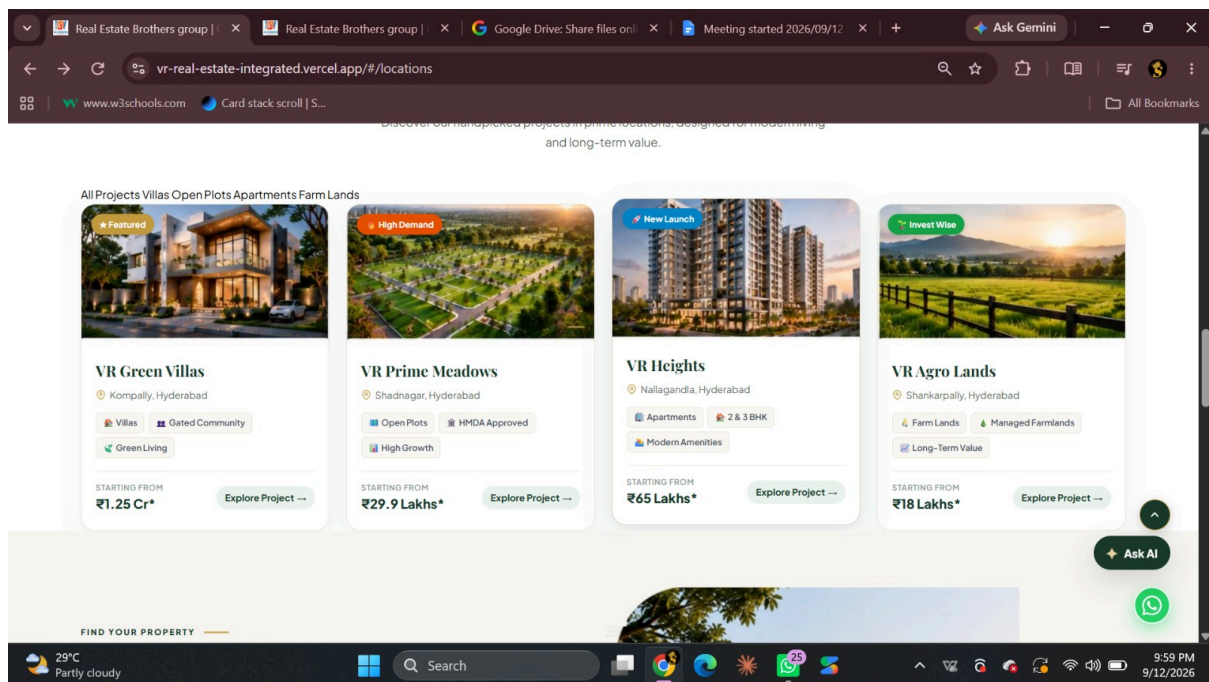

amenities location , gallery buttons ar not working and remove the floor plan button show like this directly also

10.in farmlands defaulty i am getting some name and num in filling details in send enquiry and book site vistit check it in all the send enquiry and book site vistit and make it correct

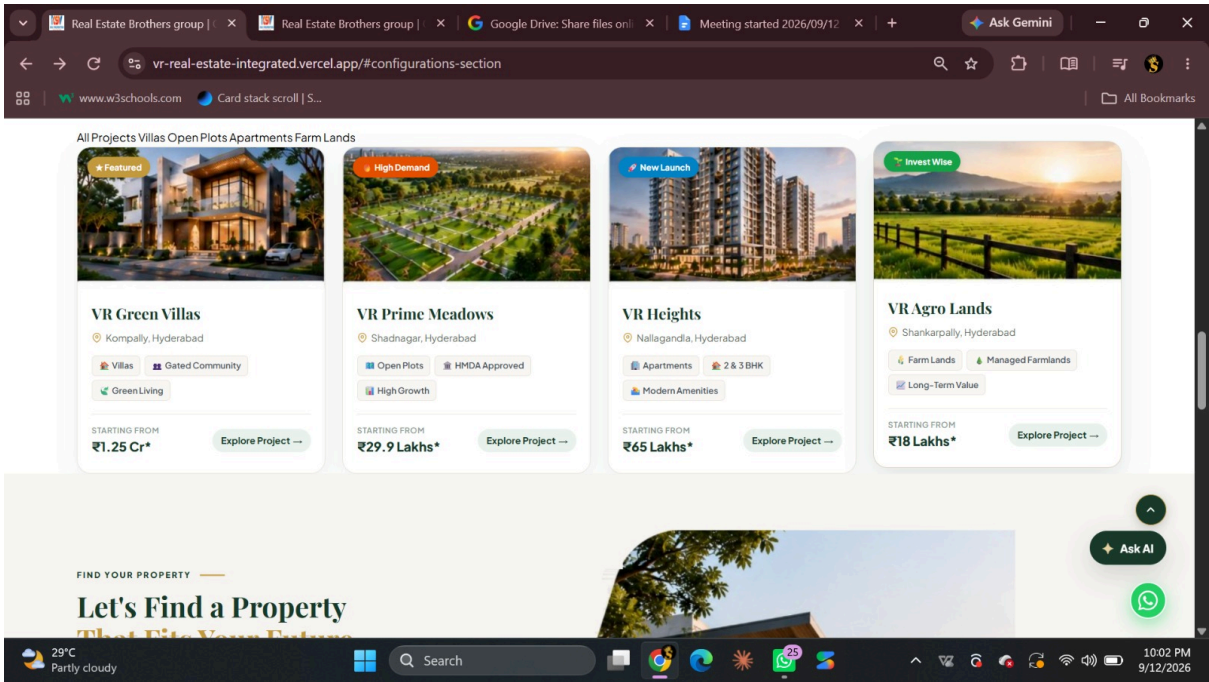

11.check where apply filters is not working

12.

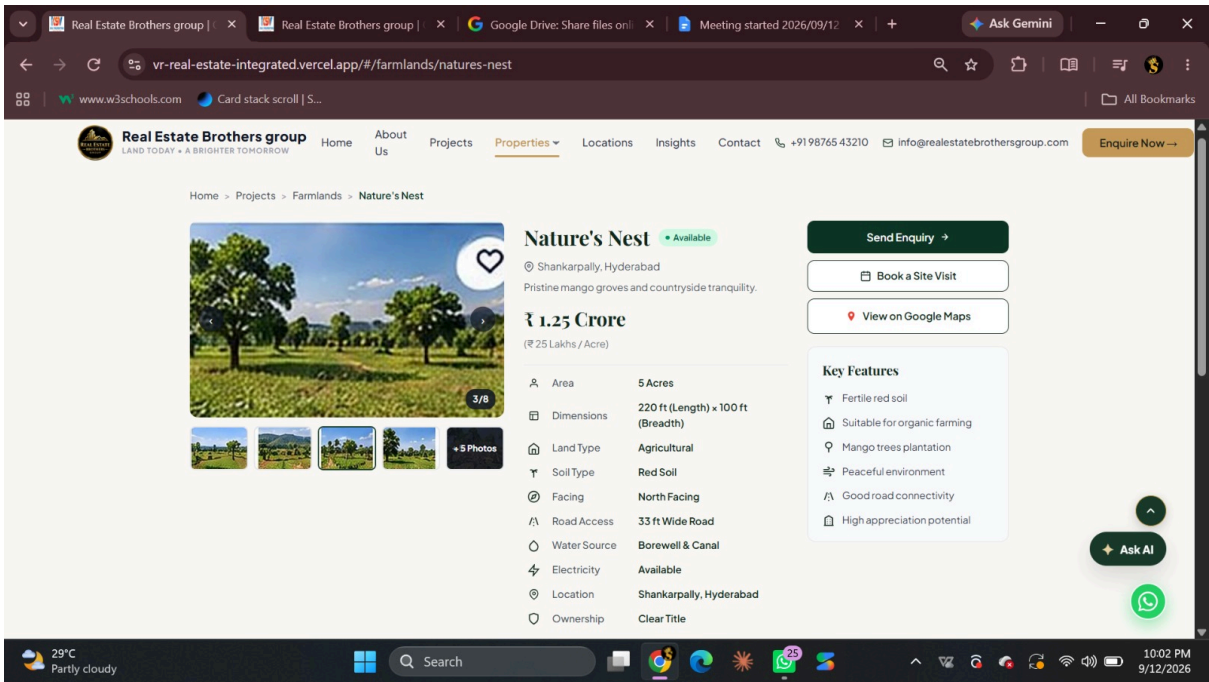

clicking on vr heights should go to this section

13.

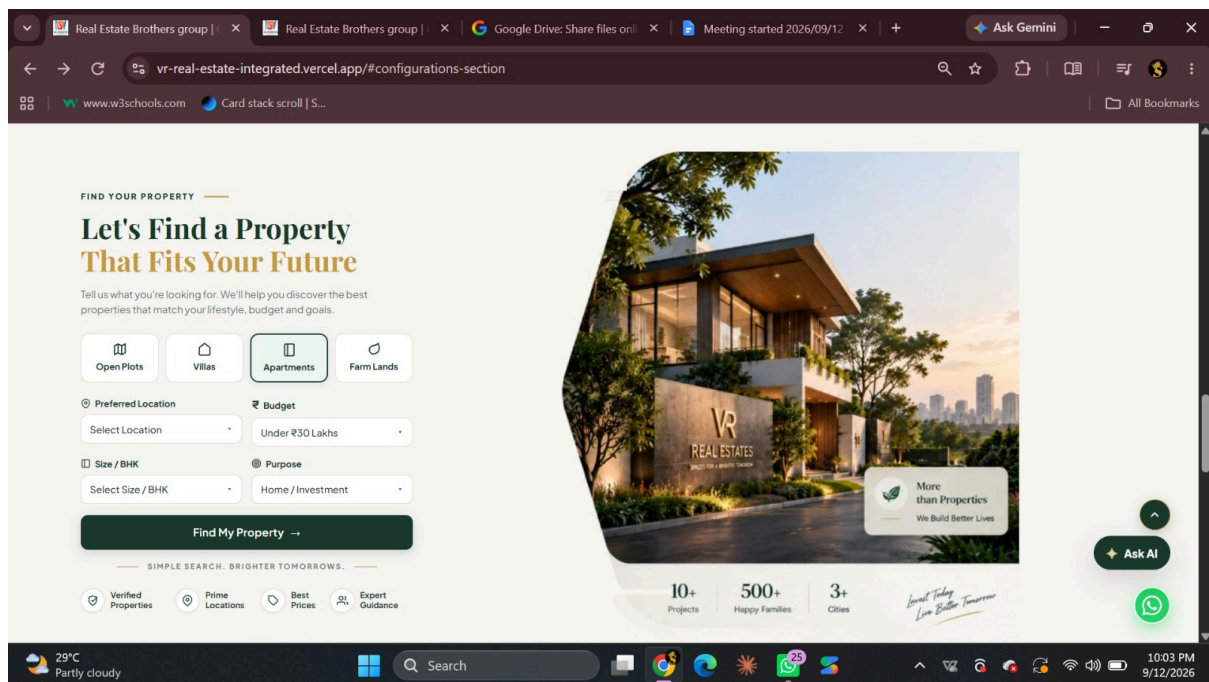

connect this vr agro land

with this page

14.

make this find my property work properly it is opening book site vist

16.submitting a request is not fast

17.for some send enquiry and book sit visti there is no constraints

18.this is all for the problems in the website see all this and tell me what you understand and i will tell you about the crm next presently check are there any other issues
